

TIE INTO OUR TECHNOLOGY

WebTech Wireless

The partner of choice for real-time location-based services and telematics

Partner with the Market Leader in Intelligent and Reliable In-Vehicle Telematics

WebTech Wireless™ is the pioneer leader in developing and manufacturing revolutionary in-vehicle telematics hardware and peripheral accessories for the commercial transport, automotive and heavy equipment industries worldwide.

Manufacturing more than 10,000 in-vehicle hardware units a month, certified by FCC, IC, CE/E-mark, UL/CSA, PTCRM and leveraging Motorola® and SiRF® components, WebTech Wireless is the single-source for in-vehicle telematics hardware solutions. With extremely low RMA rates, exceptionally high reliability and fast GPS fix times, your customer support calls are minimized and your operational efficiencies are maximized.

WebTech Locator Series: Innovative In-Vehicle Telematics of the Future

WebTech Wireless' continuous investment in Research and Development is a testament to the company's commitment to develop, manufacture, and deliver feature-rich in-vehicle telematic devices: the WebTech Locator™ Series.

The WebTech Locator Series provides GPS vehicle positioning and diagnostic information over the GSM/GPRS/EDGE, 802.11b Wi-Fi and Iridium® satellite networks across all major wireless carriers, such as AT&T™ and Orange™.

Quickly and easily customize the small and discrete WebTech Locator to meet your customers' specific requirements. WebTech Wireless' in-vehicle telematic devices can be dynamically configured to provide your customers with necessary and timely information, helping minimize unnecessary server loads and cellular costs.

Peripheral Accessories: Flexible Solutions for Your Client's Unique Needs

WebTech Wireless is more than a supplier to OEMs; we're a partner to your customers. WebTech Wireless is dedicated to support the diverse needs of your customers with our comprehensive vehicle diagnostics, complete tractor-trailer options, real-time communication and reliable support for device options.

- Monitor and control position, speed, door open/close indication, driver identification, cargo, temperature, fuel consumption, engine parameters, braking data, vehicle performance and more
- Provide accurate fuel usage, mileage, emissions assessment, servicing requirements (brake wear, oil change, etc.) with OBDII Gateway, CANbus and J1708/J1939/J1979 Engine Interfaces
- Improve information access across the enterprise and increase the safety of mobile workers with a wide range of bar code scanners and Remote/Panic Buttons
- Provide customers with access to enterprise information through Bluetooth®-enabled handheld devices with the WT1700 Bluetooth Adapter

Partner Development Kit

The development kit enables you to develop fast time-to-market solutions. Full engineering support is provided with technical documentation and development kits for easy installation and customization of the WebTech Locators. In addition, a full set of APIs provide you with easy-to-use building blocks for your hardware including:

Data Exchange

- Automatically send records from a WebTech Locator to a third party server in real-time, or query the WebTech Wireless server to receive selected vehicle reports

Landmark API

- Seamlessly upload identified Landmarks

Messaging API

- Interface to WebTech Wireless messaging in order to send text messages or over-the-air commands to a WebTech Locator

What Sets WebTech Locators Apart?

Unlike any other GPS tracking device currently offered, the WebTech Locator provides you with feature-rich functionality including:

Features

OVER-THE-AIR UPGRADES AND CONFIGURATION

- Reduce the cost to upgrade your WebTech Locator with remote configuration and upgrade capability. Build and store multiple configuration profiles per hardware unit and alternate automatically between them.

CONFIGURE DEVICES ACCORDING TO CUSTOMER UNIQUE WORK PRACTICES

- With over 130 built-in commands, you can build the WebTech Locator unit that works the way your customers do.

THIRD-PARTY SYSTEM INTEGRATION

- Access vehicle location and telematic field data you need to improve your operations through third party applications.

MULTIPLE TELEMETRY INPUTS/OUTPUTS

- Improve fleet management, reduce downtime and operating costs with cost-effective and automatic data collection of mobile assets.

AUTOMATIC DRIVER AUTHENTICATION

- Log in to vehicle systems using username and password, Key Fob or a Smart Card System. Configure the WebTech Locator to disable the vehicle starter if driver authentication cannot be verified.

REAL-TIME VEHICLE AND TRAILER TRACKING AND STATUS MONITORING

- Maximize fleet productivity and improve customer service with better performance metrics.

VEHICLE DIAGNOSTICS MONITORING

- Remotely monitor carbon emissions to meet regulatory requirements, check driver performance and minimize vehicle repair and maintenance expenses.

EXTENSIVE GEOFENCE SET

- Increase the security of your assets by generating alerts once a vehicle crosses a user-defined Geofence (available in multi-polygonal, single-circular and route format).

IN-CAB COMMUNICATIONS & CUSTOM DIGITAL FORMS

- Provide drivers with 24x7 dispatch communications with the in-vehicle Mobile Data Terminal 2000e and 2000CE device options, and minimize manual paperwork entry with electronic digital forms.

TEMPERATURE MONITORING

- Continuously track the location, status and temperature of trailer cargo to ensure safe delivery.

Why WebTech Wireless?

WebTech Wireless is the world leader in the development and installation of proven location-based services and telematics solutions. WebTech Wireless has helped over 600 customers in over 40 countries efficiently manage mobile assets around the world since 1999.

Leverage our company's unrivalled and extensive industry experience to drive your decisions for field-proven vehicle tracking and telematics solutions.

Our Professional Services team is committed to helping you build a tailored solution to meet your needs. Whether you require a full range of support from project engineering through to training and customer support, or choose to manage some aspects yourself, our Professional

Services group is on hand to help you create a seamless new environment.

Find out how WebTech Wireless products and services can help you achieve your business objectives today!
