

Fleet Monitoring Solutions by Webtech Wireless®

Improving fleet performance is top of mind for any fleet manager. If you own or manage a small, medium, or large fleet, you know that fleet productivity and cost reduction are inextricably linked. While you spend time and energy trying to identify how and where to reduce operating expenses, the cost of running a business increases at a rapid pace.

The simple and best way to reduce operating costs is to gain visibility into fleet activity. Webtech Wireless Fleet Monitoring solutions provide the critical information you need to optimize fleet performance and ultimately increase productivity by 15 to 20 percent. By implementing our Fleet Monitoring solutions, not only do you save money but you prevent theft, improve customer service and protect your brand.

Solving Your Business Challenges

- Maximize fleet utilization
- Reduce operating costs
- Prevent theft and unauthorized use
- Improve customer service
- Protecting brand reputation

Solution Features

- Real-time location monitoring
- Vehicle time on site
- Find nearest vehicle
- Google Maps traffic and weather data
- Posted speed limit monitoring
- Real-time notifications
- No installation required

Who Are You?

Cable and telecommunications

Construction

Distribution

Forestry

HVAC and plumbing

Oil and gas

Pickup and delivery

Sales representatives

Service technicians

Utilities

Maximize Fleet Utilization and Reduce Operating Costs

- Increase productivity by 15 to 20 percent.
- Gain visibility into vehicle activities—where, when and what they are doing.
- Utilize real-time Fleet Intelligence Anywhere™ to optimize fleet performance.

Prevent Theft and Unauthorized Use

- Equipment that isn't monitored is at risk for theft. Use our Fleet Monitoring solutions to safeguard your assets by automatically detecting unauthorized movement and locating vehicles and assets in real-time.

Improve Customer Service and Protect Your Brand Reputation

- Improve customer service by ensuring your delivery arrives at the customer site on time. With full visibility into your fleet, you can easily estimate the time of arrival, identify nearest vehicles, optimize routing, and re-allocate resources.
- Speeding, harsh breaking and sharp turns not only impact your fuel consumption but can hurt your brand credibility. With insight into driver behavior you can estimate the time of arrival, identify nearest vehicles, optimize routing, and re-allocate resources.

Real Customers, Real Solutions

"Quality and reliability are what we look for. Webtech Wireless delivers that."

—A. Cole Pate, Strike, Senior Vice President

"Sierra Pacific Industries uses 15% fewer trucks to haul the same volume."

—Steve Gaston, Sierra Pacific Industries

"To realize the full benefits, telematics must be seen as a complete fleet solution."

—Kevin Bookey, National Foods, Transportation Manager

"All team members now have a visibility display of the location of cranes and vehicles letting everyone know where they are in real time, making our operations safer and more efficient."

—Andy Hodges, Owner and CEO, Northwest Companies

Webtech Wireless is one of the top twenty global providers of GPS/AVL solutions, providing proven cost savings and risk management to government and commercial fleets.
